

METHODS AND APPARATUSES FOR DISPENSING CONDIMENTS

ABSTRACT OF THE DISCLOSURE

A condiment dispenser (such as a unique condiment packet, or automated device) that is configured for dispensing one or more types of condiment (e.g., ketchup, mustard mayonnaise, barbeque sauce, or Ranch dressing) relative to a food item, such as a French fry. In one embodiment of the invention, the condiment dispenser includes an injection nozzle that is configured for injecting condiment into the interior of the food item. In a particular embodiment, the injection nozzle is configured for piercing the food item's exterior surface before injecting condiment into the interior of the food item.
